Lafayette Renew Awarded 2018 Outstanding Stormwater Project

Lafayette, IN. – September 7, 2018 – The City of Lafayette is proud to announce that Lafayette Renew has been named recipient of the 2018 Outstanding Stormwater Project by the Indiana Association for Floodplain and Stormwater Management (INASFM) for work done on Brown Street in downtown Lafayette. The award was presented at the annual INASFM conference held earlier this month in Evansville, Indiana. Brad Talley, Director of Lafayette Renew, will announce the award at the **Board of Works meeting at 9:00 a.m. on Tuesday, September 11, 2018 at Lafayette City Hall.**

The Brown Street project is a great example of how Lafayette Renew exemplifies the attributes of their rebranding phase. The planning, design and implementation was performed in a manner that delivered so much more to the customers they serve and provided an example of a balance between “Green” and “Gray” infrastructure. As part of the Brown Street Project, Lafayette Renew engaged Bowen Engineering, Greeley and Hansen, and D2 Land and Water Resource to address both the mandated CSO control as well as neighborhood flooding and beautification by utilizing green infrastructure to infiltrate stormwater run-off into the aquifer. The City of Lafayette and Lafayette Renew are honored to be recognized by the prestigious INASFM group whose mission is education and advocating for responsible floodplain and stormwater management.
